<b>Q6: The force setting to move the cushion vertically was set at the factory. Was the setting correct for you?</b>	Yes
<b>Q7: How comfortable was the headrest cushion?</b>	Somewhat, Comments I didn't find myself leaning on it all the time. Partially because I have a Aeron chair that doesn't lean back far. Some Aeron chairs allow you to lean back further and if I adjusted the way I sit based on this, I would have used it more.
<b>Q8: Did you recline more than normal when using the headrest?</b>	More, Comments As much as I could recline, I did.

## Atlas Headrest User Evaluation

**Q9: Did you like the Headrest? Please comment on what you liked or disliked about it.**

Yes,

Comment

When I did use it, it was supportive and was comfortable. It worked best when my screen was a little higher. But when I looked at a laptop screen, I found myself not using the headrest because I was looking down due to a lower viewing position on the desk.

**Q10: Would your overall productivity be improved when using the headrest?**

Not at All,

Comments

I can't say my productivity was measurably improved. I could only say that it made working a little more comfortable in many situations.

**Q11: How many days did you use the headrest?**

13

**Q12: If your company made this available to you, how likely would you be to request it?**

Likely

**Q13: Would you be willing to write a testimonial about the your experience using the headrest that we could post on our website or social media sites?**

Yes,

Testimonial (name optional)

I think the headrest offers a lot of comfort, especially if you have your monitor at a higher height and if you tend to lean back while you sit.

**Q9: Did you like the Headrest? Please comment on what you liked or disliked about it.**

Yes,

Comment

I'm used to sitting forward when using the computer so it was an adjustment to sit back and rest my head while using the computer. I have bi-focal glasses and looking down while resting my head on the headrest made it difficult to see the computer screen. The only other issue I had is that I like to keep a sweater hanging on my chair and trying to get it off the chair with the headrest while sitting was challenging because it would get caught in the headrest. Concerned that it would snag. I have a bad neck and found the product to be very comfortable especially on those days I was having pain or tension. If I could see the computer screen while using the headrest, I would have used it more. Thanks for the opportunity to test out the product!

Very relaxing when leaning back. Provides great support for my head and allows the entire body to completely relax. The headrest is adjustable in many different ways to give me that perfect position.

**Q9: Did you like the Headrest? Please comment on what you liked or disliked about it.**

No,

Comment

I am a woman with longer-than-shoulder-length hair. Sometimes I wear it up in a large clip at the back of my head. This hairstyle is not compatible with a headrest (I have problems wearing this style in my car, as well). But even when my hair was down, I felt like my hair got in the way when I tried to use the head rest. I also found it too easy to push the headrest back along the horizontal axis when I was trying to rest back on it. I was hoping that the headrest would feel supportive and give me a way to relax back occasionally, but it didn't work that was for me. I also hang my coat or jacket on the back of my chair often, and the headrest's support structure made that difficult and made the overall look of the chair (with the jacket draped over it) lumpy and much less stylish. I also didn't like how the support structure for the headrest forced the lumbar support of my chair into a lower position than I'd like.

While looking a little odd, the headrest was extremely helpful and definitely made working on a computer all day a lot more comfortable. It was able to adjust very easily as my position changes throughout the day. I recommend it!

Yes,

Testimonial (name optional)

The headrest was extremely adjustable, which really made it easy to use. I thought it would not work for my sitting style, but it turned out to be very supportive and comfortable. I miss it.

<b>Q7: How comfortable was the headrest cushion?</b>	Comfortable
<b>Q8: Did you recline more than normal when using the headrest?</b>	No, Comments I honestly found that I didn't recline as much as I thought.
<b>Q9: Did you like the Headrest? Please comment on what you liked or disliked about it.</b>	Yes, Comment It was nice, but I found that when I recline to work, my head was oriented a little too high, so I had to be peering down at the computer. I couldn't really find a comfortable position where I could be reclining with the headrest and have my eyes be directed forward at the computer in a natural way.
